

OCS: (3RD GENERATION COMPUTERS) *also OCS accomplishments*

DD/S&T 3400-66
27 June 1966

Chas. A. Briggs Memo to Actg Secty CODIB, thru: DDS&T
Sub: OCS Contribution to CODIB Annual Report for FY 66

Implementation of the OCS plan for transition to 3rd generation computer systems was initiated with the installation of an IBM 360/30 computer (later replaced by a 360/50) and the successful implementation of a multi-tasking utility capability developed by OCS early in FY 66. In order to assure its full participation in COINS I, OCS has advanced its schedule to provide remote facilities and initial on-line time-sharing services to in-house and community ~~xxx~~ customers... the target date is October 1966.

STAT The major accomplishments in Agency scientific computing
STAT services have been the development of analytical techniques
and the writing of computer programs [redacted]

STAT ~~s~~ Development of flexible analog to digital processing
capabilities during the past 12 months progressed on schedule.
[redacted]

STAT Computer and high precision automatic plotting capabilities
greatly advanced to support cartographic activities.

STAT Quantity and variety of new ADP file handling jobs for
intelligence analysts leveled off in FY 1965. Efforts to
increase effectiveness of these jobs and to train programmers
for heavy task of converting applications to 3rd generation.
[redacted]

OCS provided assistance/guidance to Support Directorate
in an extensive study and redesign planning of its data
processing activities.
